

**Make your home  
a Calor home**

**CALOR**

## With Calor, you can enjoy all the benefits of gas, wherever you live.

As the leading supplier of LPG in Ireland, we make it possible for each and every home and business in the country to have gas, even off the natural gas grid.

Since 1937, our mission has been to do things better, providing our customers with clean, efficient energy solutions which can be tailored to your home's needs and location.

Get in touch today and see how we can make things better for you.

### Switch today and enjoy:

- ✓ Instant heat in your home
- ✓ More controllable cooking
- ✓ Hot water on demand\*
- ✓ The joy of a glowing, real flame fire
- ✓ Manageable monthly gas bills, with EasiPay
- ✓ Our automatic top-up service
- ✓ A fuel that cannot be stolen

\*Combi boiler only.

## Making the switch is easy.

Choose Calor for your home energy and we'll look after every step of the switch for you.

**1**

### Your energy

We'll explain exactly what's involved in the switching process, and what your cost and payment options are, including potential SEAI grants which may be available.

**2**

### Home visit

We'll arrange for one of our dedicated home energy consultants to visit your home to assess your needs. You can choose your own RGI installer, or we can recommend one in your area.

**3**

### Tailored for you

We'll work out the best way to convert your home.

**4**

### Your conversion

Once we agree a package, we can arrange for the tank to be delivered.

**5**

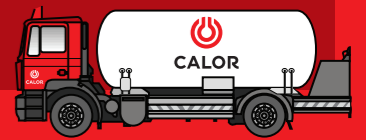

### Your boiler installation

Your RGI installer will fit an LPG boiler of your choice.

**6**

### Now you're up and running

Your installer will connect your boiler to your gas tank, and arrange your first delivery of Calor Gas.

## Grants and incentives – it’s probably more than you thought.

If you live in the Republic of Ireland and are off the natural gas grid, you can enjoy fantastic value and efficiency by switching to Calor Gas. You can also make great savings by availing of the various home energy grants which are currently available to Irish homeowners, and improve your BER too.

### SEAI grant

The SEAI Better Energy Homes scheme provides grants to homeowners who upgrade their homes with energy efficiency measures. See more at: [www.seai.ie](http://www.seai.ie)

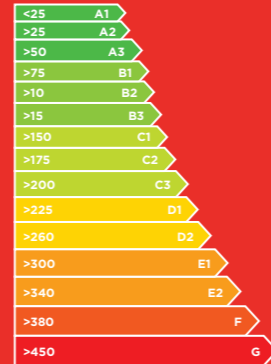

### Make improvements on your home energy efficiency

If you upgrade an old central heating system to a new high efficiency gas boiler and heating controls, you can improve your Building Energy Rating (BER) and make savings.

Benefits of Heating Controls\*

- 1. Reduce energy usage
- 2. Heat when you need it
- 3. Zoned for more efficiency

## Interested in switching to Calor Gas?

Complete a switching form on [www.calorgas.ie/switch/apply](http://www.calorgas.ie/switch/apply) you will then be contacted by a member of our Home Energy Support Team

# Environmentally conscious options.

Naturally greener, Calor Gas is a cleaner burning fuel, which generates considerably lower CO<sub>2</sub> emissions than oil, peat, coal or electricity. It also has a lower carbon tax than oil.

# Calor BioLPG. A small choice we can all be proud of.

BioLPG is 100% renewable energy. Made from sustainably sourced renewable and waste materials, it reduces your home's carbon footprint by at least 50%, so it's even kinder to the environment. Otherwise it's identical to regular LPG which means you can switch completely to BioLPG or use it as a proportion of your mix. So it's a small choice that can make a big difference.

## Meet the first home owner in Ireland to switch to Calor BioLPG.

Danny Cahill recently made the switch to Calor BioLPG. 100% renewable energy. He was looking for an alternative to his geo-thermal system which had never worked satisfactorily. The family found it too expensive to run, plus it didn't deliver sufficient heat to keep the whole house warm. Danny's decision to move to BioLPG was driven by his concern for the environment. He believes that oil has had its day and that more and more people are looking for environmentally friendly options. Now he is *"looking forward to just pressing the button and having instant heat"*.

**Customer:** Danny Cahill  
**County:** Kildare  
**Home:** Bungalow  
**Original Fuel:** Geothermal  
**Heating Type:** 100% BioLPG  
**Appliances using Gas:** Cooker  
**Met with Calor Installer:** Michael Hackett, O'Neill's Plumbing & Heating  
**Tank:** 310kg Above Ground Tank

1. Above ground tank

## Tank storage options.

Calor bulk tanks ensure you have a secure supply of home energy.

They are available in a range of options:

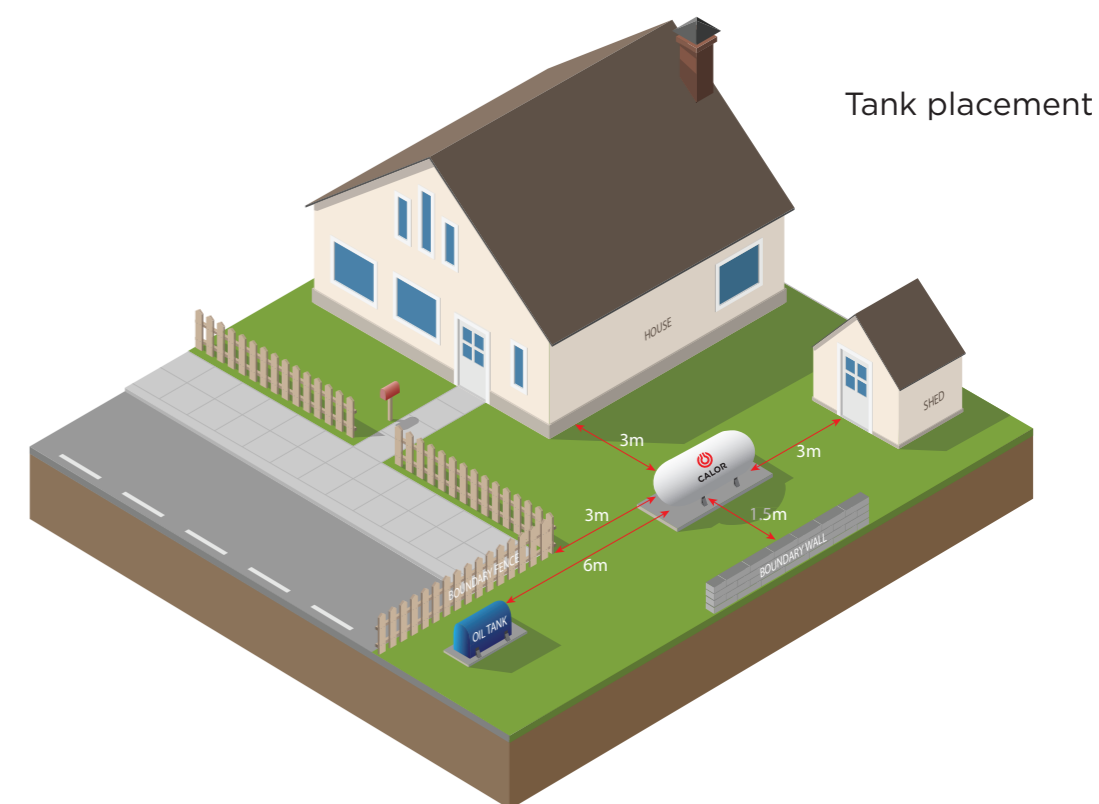

1. Above ground (available in green and white)
2. Semi-mounded
3. Cylinders

2. Semi-mounded tank

3. Cylinders

An above ground or semi-mounded tank needs sufficient space. The tank must be 3m clear of any source of ignition, 1.5m from overhead cables and the area it's in must be free of rubbish and combustible materials.

## Do more with Calor.

We're much more than a home heating supplier. Now Calor can be used to power every aspect of your home life.

Here are just some of the ways that Calor can power your home:

### Happier drying

Whatever the weather, you can look forward to great drying with a Calor powered tumble dryer. It's the most reliable and cost efficient route to dry clothes indoors.

### Heat on the spot

Enjoy instant heat where and when you need it with a portable space heater. As the most efficient way to warm up any room, it'll help you save time and money. With something to suit every taste and budget, browse our range at [shop.calorgas.ie](http://shop.calorgas.ie)

### A real flame fire

Enjoy the warmth of a real flame fire, at the click of a button, with our range of stylish gas fires. Finally you can have the glow of an open fire, without any of the clean up.

### Controllable cooking

Instant controllable heat, responsive temperature control, food that's cooked to mouthwatering perfection – switch your cooking to Calor, and you'll never look back.

### Barbecues and patio heaters

Why not make the most of the great outdoors with our fantastic range of barbecues? Whether you're a barbecue novice or an expert, you can enjoy flame-grilled feasts all year around, thanks to our patio heaters.

Visit [shop.calorgas.ie](http://shop.calorgas.ie) to view our full range of gas appliances.

**Making life easy for you  
after you switch.**

## EasiPay plans

We have designed our EasiPay Plan to help you to spread the cost of your fuel bills throughout the year. You can pay for your full year's supply of gas and standing charges in 12 monthly planned payments and Calor will continue to deliver your gas on a regular basis. A fixed amount is processed by Direct Debit on the 28th day of each month.

If you wish to avail of EasiPay, please contact our Customer Care Team on 1850 812 450.

## Direct debit

If you would prefer not to spread your payments over 12 months, you can also opt to pay for each delivery in full by Direct Debit. This will be set up when you join Calor.

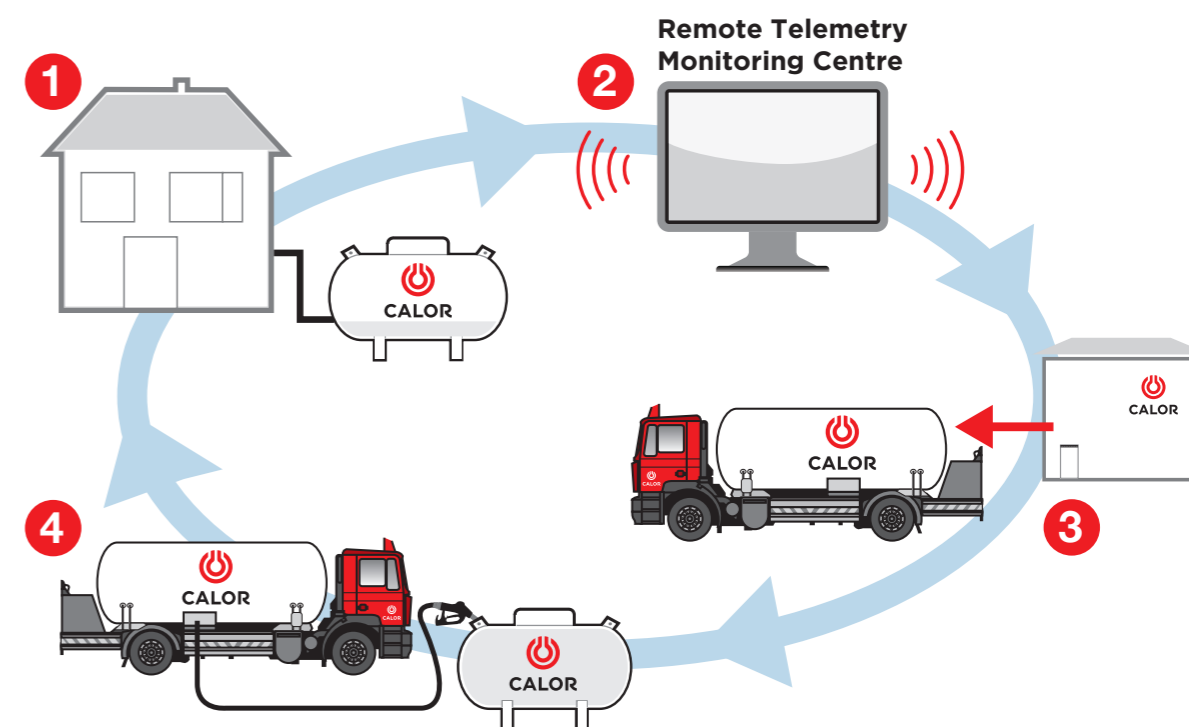

If you are not on automatic top up, you can call us to order, or go online to [mycalorgas.com](http://mycalorgas.com)

## Your supply

Tank Maintenance – We'll look after your gas tank, with regular inspections and checks, as well as maintenance when required.

### Automatic top-up

Enjoy added peace of mind knowing you'll never run out of gas when you choose our automatic top-up service. Your tank will be fitted with an automated telemetry system that constantly monitors your fuel level and sends us a message when it needs filling.

- |   |  |  |  |
|---|--|--|--|
| 1. Telemetry gauge activates when LPG in your tank reaches certain level. | 2. Our monitoring centre is alerted that your tank needs to be refilled. | 3. Calor Gas delivery tanker is dispatched from local depot. | 4. Tanker arrives at your home to fill tank in plenty of time. |
|---|--|--|--|

## Manage your account online with mycalorgas.com

Time is precious, so the easier we can make things for you the better. Now you can manage your account online with mycalorgas. So you're in control round-the-clock.

- Avail of discounts and promotions
- Go green by registering for paperless billing
- You can sign up for Direct Debit/EasiPay options
- You can also contact us to answer any queries you may have.

## Calor success stories.

These people switched to Calor for a better home energy solution.

**Customer:** Susan  
**County:** Tipperary  
**Home:** 1-Bed Cottage, approx. 1,000 sq. ft.  
**Original Fuel:** Solid Fuel  
**Heating Type:** Radiators  
**Appliances using Gas:** Cooker

**Met with Calor Installer:** Mike O'Brien  
**Availed of:** Price Freeze and Free Combi Boiler  
**Tank:** 600kg Above Ground Tank

Susan owns a small 1-bed cottage. Recently she switched from solid fuel to a Calor home heating solution and she's thrilled with the results. Her new combi boiler is much quieter and more compact, fitting nicely into her kitchen. She also started cooking on gas too and loves its precision and control. She prefers to monitor gas levels herself and pay for top ups over the phone, as this gives her greater control over her budget. Ever since she's made the switch, Susan finds that she's using far less fuel. She even had to turn the thermostat down because it was too hot. Susan is environmentally conscious and keen to learn more about Calor BioLPG.

**Customer:** Declan  
**County:** Tipperary  
**Home:** 4-Bed Dormer House, approx. 2,500 sq. ft.  
**Original Fuel:** Oil  
**Heating Type:** Radiators and Underfloor Heating  
**Appliances using Gas:** Fire and Cooker

**Met with Calor Installer:** Thomas Gayson  
**Availed of:** Free Gas and Price Freeze  
**Tank:** 600kg Above Ground Tank

Declan has a 4-bed dormer house, and small kids. He made the decision to switch from oil to gas, as it's a better solution for his family. As a father, he likes that gas is clean and safe. As a business owner, he no longer needs to worry about his supply running out as it's monitored remotely and topped up automatically. He also likes that it cannot be stolen. He's so pleased he made the move, he even recommended Calor to his brother and sister.

**Customer:** Olive  
**County:** Tipperary  
**Home:** 6-Bed 2-Storey House, approx. 4,000 sq. ft.  
**Original Fuel:** Oil  
**Heating Type:** Radiators  
**Appliances using Gas:** Cooker

**Met with Calor Installer:** Bernard Bourke  
**Availed of:** Free Gas and Price Freeze  
**Tank:** wt and 310kg Tank

Olive owns a large 2-storey house just outside the town. Heating her house was costly due to the inefficiencies of her previous oil boiler. Despite her remote location, she was delighted to discover that gas was still an option for her, with Calor. Two new gas boilers and a combi boiler were installed, her zoning was upgraded and her supply is now monitored automatically, so heating her home is now way more efficient.

**Customer:** Sean  
**County:** Cork  
**Home:** 4-Bed Bungalow, approx. 2,000 sq. ft.  
**Original Fuel:** Oil  
**Heating Type:** Radiators  
**Appliances using Gas:** Cooker

**Met with Calor Installer:** Ger Sweeney  
**Availed of:** Free Gas and Price Freeze  
**Tank:** 600kg Above Ground Tank

Sean lives in a large 4-bed bungalow in Ballycotton. His previous heating system was inefficient, and costing him a fortune in oil. After replacing the oil boiler with a high efficiency indoor gas model, he's delighted with the changes. His fuel bills dropped, his house feels warmer and he no longer has to monitor his own fuel supply - a major plus for a busy business owner. And the best part - Calor handled everything from the initial consultation and tank delivery to installation and final certification.

**Customer:** Nigel  
**County:** Westmeath  
**Home:** 4-Bed Semi-Detached House in an Estate, approx. 1,400 sq. ft.  
**Original Fuel:** Oil  
**Heating Type:** Radiators  
**Appliances using Gas:** Cooker

**Met with Calor Installer:** Kevin Nea (Neaco Energy)  
**Availed of:** Free Gas and Price Freeze  
**Tank:** Semi-mounded tank in the front lawn

Nigel has a 4-bed semi-detached house. His inefficient oil boiler wasn't enough to heat the house during the winter months, so the wood-burning stove was always on the go too. Due to a recent change in personal circumstances, Nigel finally decided to switch to gas, and he hasn't lit the fire since so he's really noticing the savings. He no longer has to haul briquettes and logs into the house, so heating his home is now much easier and cleaner. He also pays his bill monthly, so there's no spike in his heating bills during the winter. His only regret is that he didn't move sooner.

**Customer:** Conor  
**County:** Antrim  
**Home:** 4-Bed Detached approx. 2,700sq. ft.  
**Original Fuel:** Oil  
**Heating Type:** Radiators  
**Appliances using Gas:** Cooker

**Met with Calor Installer:** PJ Mullan & Sons  
**Availed of:** Free Gas and Price Freeze  
**Tank:** 600kg Above Ground Tank

Conor and his family moved from their previous home to a larger 4-bed detached house, with an old boiler. It couldn't cope with their growing family's needs for hot water and having enjoyed the benefits of gas before, they wanted the same again. Conor was delighted that Calor could offer them gas, although they're not on the natural gas network. On their installer's advice, the family opted for the Vaillant Green IQ. Their big garden easily fitted a bulk tank and the existing boundary wall met gas tank clearances. Conor also loved the idea of automatic top-up, so they won't run out of fuel and is very interested in Calor's new renewable fuel, BioLPG.

# We're always here to help.

Our Home Energy Support Team will be with you every step of the way. Whatever you need, we'll support, advise and guide you to the best possible solution.
